Plants Out of Place

Introduction

Weeds are plants out of place, and the place they are out of is always a political one. This paragraph is long enough to wrap across several lines on the page so that the importer has to join the lines back into one paragraph again.

With the onset of similar controversies, Whatmore (2009) argues that where once “scientific knowledge claims were called upon to settle dispute, their contestation has become a matter of routine” (Whatmore, 2009, p. 589).

Body

A short bold subheading

Weeds are plants out of place, and the place they are out of is always a political one. This paragraph is long enough to wrap across several lines on the page so that the importer has to join the lines back into one paragraph again.

The final sentence of this page continues onto the next page without a full stop and the next page carries

on with the rest of the sentence. A deliberately hyphen-

ated word should be joined. Weeds are plants out of place, and the place they are out of is always a political one. This paragraph is long enough to wrap across several lines on the page so that the importer has to join the lines back into one paragraph again.

Conclusion

Weeds matter politically.
